Education

Hindustan Institute of Technology and Science

Bachelor of Technology in Computer Science Engineering in AI and DS

Sept 2022 - Present

Chennai, India

Projects

CLIXOR – Natural Language to Blender Automation System | Python, Blender API, NLP, Web Interface

- Developed a system that converts natural language instructions into executable Python scripts for Blender.
- Integrated reference image input to enable context-aware and accurate 3D scene generation.

Client Request Automation & Lead Filtering System | n8n, Webhooks, Gmail API

- Built an automated workflow to capture and filter client requests based on budget criteria, identifying high-value and negotiable leads.
- Automated client communication and forwarded shortlisted leads to internal teams, reducing manual screening effort by 60%.

Bone Fracture Detection | Python, OpenCV, TensorFlow, Scikit-learn

- Implemented a medical imaging system to automatically detect bone fractures from X-ray images.
- Applied convolutional neural networks to improve fracture detection accuracy and reliability.

TeraFarm – E-Commerce App for Agriculture | Flutter, Firebase Firestore, Android Studio, GCP, Gemma

- Developed a smart farming platform providing a digital marketplace for agricultural products and services.
- Winner of the National Level Infosys Hackathon 2025 held in Hyderabad.

Assistive Application for Disabled Individuals | Flutter, Firebase, Python, Google MediaPipe, APIs, AWS

- Designed and developed an accessibility-focused mobile application to enhance independence for disabled users.
- Integrated assistive features such as gesture-based interactions hosted on AWS, and daily-use support tools.

Professional Experience

e-Luminate Digital Team

March 2024 - April 2024

Hindustan Institute of Technology and Science

Chennai, India

- Completed a one-month internship for the work done in the fields of **3-D modeling, designing, and digital media creation**.
- Created a website and all the 3D assets required for it using **Blender**. **Increased User Interaction and User Experience by a margin of 40%.**

CSI Chapter Club

Mar 2024 - May 2025

Hindustan Institute of Technology and Science

Chennai, India

- As the core member of the CSI Club, I coordinated club activities, organized webinars, and facilitated effective communication between members and faculty.
- I oversaw projects, scheduled meetings, reported progress, and contributed to strategic planning, fostering a collaborative environment that promoted student engagement and growth.

Worked for Startup

Aug 2025 - Nov 2025

Soil Steps

Chennai, India

- Developed a Research app that allows users to search, access, and organize multiple research papers from various sources in one place.
- The app is designed to help students, researchers, and professionals easily explore academic content, bookmark papers, and manage their study or project references efficiently.

Technical Skills

Languages: C#, C++, C, Java, Python, Flutter, HTML/CSS, R

Developer Tools: Unity Engine, Aseprite, Blender, Figma, FlutterFlow

Cloud & DevOps: Google Cloud, Zoho Catalyst, Git, AWS

Testing: Postman, Github Actions

Productivity: MS Excel, Powerpoint, Word, VS Code, PowerBi, Canva

AI Tools: Claude Code, Cursor AI, Github Copilot, OpenAI
